

Class Climate v9.1 for Faculty

ClassClimate (survey.chapman.edu) is the online software Chapman uses to manage its student evaluations of faculty. Evaluations are sent to faculty via Chapman email after confirmation of grades being submitted is received. The system is also opened a few times a year for faculty to access the prior 6 years of course evaluations (for older evaluations, please email survey@chapman.edu). Faculty will receive an email when this access is available.
